Manufacturer: [Yamaha](#)

Description

While the FZR takes solo sports riding to fresh heights, it also offers luxury and versatility - including a sport-bolstered seat – making it a very capable, super-fast cruiser for two.

The combination of lightweight NanoXcel® hull and supercharged 1812cc EFI engine delivers enormous power and thrust, while the rounded keel and bow shape make extremely tight turns easy. You'll relish the nimble, sure-footed handling and stability, even in the choppiest water. The fastback styling only serves to underline the FZR's formidable character.

The unique telescopic steering adjustment means you can switch effortlessly between a lean-forward riding position and a stand-up style.
